## Projects

### Software Development (8+ projects)

#### Star Bus Service (April - May, 2015)

Star Bus Service is a project which provides users the facility to book their seats for long routes. The users can choose seats as per their choice if they aren't reserved and also get them changed till all the seats are reserved.

#### Deepak Printers (January - March, 2016)

This is a Print Shop management Software, which provides facilities like maintaining daily cash, keeping records of sale and purchase, generating and printing the bills. The project also has option to create database backup as and when required.

#### Course Portal (April, 2017)

The project is related to education field. It has options for faculties to upload tutorials for various programming languages and create tests related to them, while students can access this and get benefited themselves and take test to know what and how much they learned.

#### OLTP (May, 2016 - Present)

Web App project based on ERP system developed during internship period. My role in this project was to develop a complete module of student management. In this I had to mainly develop the front-end part, with small changes in back-end. The project was based on EJB (J2EE). After successfully completing my first role, I was given previously developed modules to review and do all the necessary changes in order to make them fully functional.

#### Bootstrap Server (April, 2018)

The project was developed to get deep knowledge of advanced JAVA. The project actually worked like a actual Bootstrap Server i.e. it provided a unique value to each new system getting connected and data sharing between these systems was done through administrator server, which managed complete functioning of the system.

### Android App Development (5+ projects)

#### Registration and Details App (February, 2018)

The app uses qrcode to register a user. The app also has options to upload pic and id proof of the person getting registered. After the person has been registered via the scanner app user can view the details of the registered person. The app was successfully implemented at "Beyond The States(National Level Democracy Event)."

#### Student Mobile App (March, 2018)

The app is based on ERP solution which provides functionalities like viewing attendance, checking issued books, viewing TimeTable, giving feedback, etc. The student can even send SOS notification to parents/ teachers in case of emergency. The app was developed as Smart India Hackathon-2018 project. My role was to develop front-end and UI of the application.

#### Pratikriya App (May - July, 2018)

The app is feedback system which provides user to get the required information from the organization to which he is associated. This app was developed by me during internship. I was the core developer and app has been successfully implemented across organizations.

### Web Development (6+ projects)

- ICETCE 2018 (SKIT) - www.icetce.in
- Pravah 2018 (SKIT) - www.skitpravah.com
- FDPCSE 2017 (SKIT) - www.skit.ac.in/fdpcse2017
- NCSEAM 2016 (SKIT) - www.skit.ac.in/ncseam2016
- NCETCE 2016 (SKIT) - www.skit.ac.in/ncetce2016
